

THE SCENE AI / CREATOR OS

START HERE

THE SCENE OS

Your full plan, from character idea to posted episode.

CREATE THE CHARACTER. DIRECT THE SCENE. BUILD THE WORLD.

PART 01 OF 19

THE
SCENE AI

CREATE CINEMATIC CONTENT.
BUILD YOUR DIGITAL WORLD.

How to use this system

The SCENE AI is not a pile of random prompts. It is one connected system for creators. Do the modules in order the first time. Once your character is locked in, come back to just the modules you need for each new episode.

STEP	MODULE	RESULT
1	Character First	Choose who the audience will follow.
2	Prompt Pack	Build the MASTER, DNA sheet, body lock and expression library.
3	Outfit + Hair Systems	Pick the look for each episode without changing who the character is.
4	Reference Blueprint	Give every image you upload a clear job.
5	The SCENE Method	Direct Story, Cast, Environment, Now Build and End Stamp.
6	Continuity System	Make Part 2 look like it begins one second after Part 1.
7	Camera Bible	Put the camera in a believable spot and control how it moves.
8	Realism Check	Catch the details that make AI look fake.
9	Generate, Post, Review	Post your video, study how people respond, then build the next episode.

THE ONE RULE

Character first. Then story before look. Lock in your person one time. For every episode, decide what happens before you pick the clothes, the place or the visual effects.

Your road map

START HERE**1****CHARACTER FIRST**

MODULE 01

Pick who your audience will follow.

2**PROMPT PACK**

MODULE 02

Make your MASTER face and DNA photos.

3**OUTFIT + HAIR**

MODULES 09 + 10

Pick the look for this episode.

4**REFERENCE BLUEPRINT**

MODULE 04

Give every photo you upload one job.

5**THE SCENE METHOD**

MODULE 03

Direct the scene: story, cast, place.

6**CONTINUITY SYSTEM**

MODULE 05

Make Part 2 match Part 1.

7**CAMERA BIBLE**

MODULE 07

Put the camera in a spot that makes sense.

8**REALISM CHECK**

MODULE 08

Catch anything that looks fake.

9**GENERATE + POST + REVIEW**

MODULES 06 + 12

Post it. See what works. Repeat.

POST IT

What is included

- › Character First
- › The Prompt Pack
- › The SCENE Method
- › The Reference Blueprint
- › The Continuity System

- › Camera Bible
- › Realism Check
- › Women's Outfit Pack
- › Men's Outfit Pack
- › Women's Hair Pack
- › Men's Hair + Grooming Pack
- › The Prompt Vault
- › The Viral Story Blueprint
- › Hook Vault
- › Caption Vault
- › Comment Blueprint
- › The SCENE Files

Your tool kit — the apps you need

You only need three tools: one that makes photos, one that turns photos into video, and one that edits. The system works in ANY app that can use your MASTER photo as a reference. These are the popular picks right now:

THE JOB	POPULAR TOOLS	TIP
Make the face and photos	Nano Banana Pro, Higgsfield, Midjourney, OpenArt	Pick one with a character or reference feature.

THE JOB	POPULAR TOOLS	TIP
Turn photos into video	Higgsfield 2.0, Kling, Veo, Runway	It MUST accept multiple reference images.
Edit, captions and sound	CapCut, InShot	CapCut is free and enough to start.

The bigger your scenes get, the more reference images you will use at once — one for identity, one for hair, one for the outfit, one for each location. Tools like Higgsfield 2.0 are built for this. The full multi-reference master template is in Module 11.

Switching apps every week is how characters drift. Pick your three and commit.

- › Free versions are fine to start. Upgrade when episodes are working.
- › Upload your MASTER photo into every tool, every time.
- › Keep the SAME three tools for a whole series.

Tools change fast. If a new app comes out, the system still works — the prompts and the method do not change.
