

THE SCENE AI THE MASTER BUILD

One document. Zero to running ads. Work top to bottom – everything is paste-ready.

This file contains the whole business: group settings, About page, every classroom section and lesson (names, 15-word tile descriptions, full copy, exact files), the rank wall, seed posts, the funnel, and the five launch ads. If it's not in here, it doesn't exist yet.

All files live in **scene-os/skool-upload/** under their student-facing names – upload straight from that folder.

THE RULES (read once, they run everything)

1. THE MONEY RULE. Personal money never funds this business past the \$9/mo Skool bill. Not rent, not savings, not credit. Every upgrade – Pro, ads, credits – is bought by revenue the business already earned.
2. PRICE. \$9/month flat until 50,000 members. No fake thresholds, ever. The only scarcity line allowed: "The price goes up as we grow."
3. NO FREE TRIAL. 7-day money-back guarantee instead. Charge \$9 on day one. Any member who asks inside 7 days gets it back, no questions.
4. CLASSROOM VOICE. Members already paid. Inside open sections there is no "free," no "get," no "offer" – that's funnel language and the funnel is over. Talk to the director they're becoming: cast, direct, lock, produce, release. Selling copy lives ONLY on the locked World Builder tile and WORK WITH ME.
5. FILM LANGUAGE everywhere. Creator or director, never student. Concept, not idea. Cast, not created. Locked, not chosen. Produce the episode, not make the video. Release, not post. Production references, not reference images. Production checklist, not checklist. The Production Blueprint, not the road map. The production pipeline, not the workflow.
6. EMOJI KIT. Brand: 🎬 🎥 🎞️ ⚡ 🌐 👁️ · Structure: ✅ ❌ 🌟 !! 📢
· Banned: 🚫 💰 📊 📁 and gendered decoration in brand copy.
7. NO EM DASHES in customer-facing copy. Hyphens only.

8. PROMPTS ARE SACRED. Never reword anything inside a prompt block – members paste those into AI tools.

STEP 1 • GROUP SETTINGS (live – verify these)

Day one on set: watch the welcome, cast your lead, post your intro. Start here.

Lesson 1 · Day one on set – attach your 2-minute phone video:

You're the director now. This is your studio.

Your first 24 hours: 1. Watch this. 2. Open "Cast your lead" and build your character – him or her. 3. Post your intro in  Start Here: who you are + who you're building.

 That's a wrap – mark complete when your intro is posted.

Lesson 2 · Cast your lead – attach [Cast Your Lead.pdf](#):

Every world starts with one face.

Open the Starter, tap the assistant, and talk. It interviews you and builds your character in front of you – him or her. When they're standing there looking real, save that photo. That's your MASTER. Their ID card, forever.

 That's a wrap – mark complete when your MASTER is saved to your phone.

Lesson 3 · Your drop schedule – no attachment:

On the 1st of every month a new drop lands in MONTHLY DROPS: 30 scenes, 10 looks, and one Master Scene filled out and ready to shoot. One scene a day is a month of episodes. You never write from a blank page again.

 That's a wrap - mark complete when you've opened Drop 001.

Modules 01 to 04: cast your lead, lock the face, release your first episode.

Lesson 1 · The Map - attach **The Creator OS Map.pdf** +

The Production Blueprint.pdf (map first):

This is how a real studio runs a show - and how you run yours. Four zones:  CASTING,  STORY DEVELOPMENT,  PRODUCTION DESIGN,  PRODUCTION + RELEASE. You move forward when a zone is LOCKED.

First episode: run the zones in order, top to bottom. Every episode after: your cast and world are already locked, so you jump straight to STORY and roll. The second file is the full Production Blueprint - every zone, every checkpoint, every module.

 That's a wrap - mark complete when you know which zone you're in today.

Lesson 2 · Module 01 - Character First - attach

Module 01 - Character First.pdf:

Why every viral AI page you've seen built the character BEFORE touching the camera - and how to make the one decision most people skip. This is the foundation everything else stands on.

 That's a wrap - mark complete when you've written your character's one-line identity.

Lesson 3 · Module 02 - The Prompt Pack - attach

Module 02 - The Prompt Pack.pdf:

The MASTER prompt and the DNA batches - copy, paste, fill the [BRACKETS]. By the end of this module your character has a face that never changes and a full set of reference photos.

Lesson 4 · Module 03 - The SCENE Method - attach

Module 03 - The SCENE Method.pdf:

How to direct your first episode: the scene, the camera, the moment. This is where your character stops being a photo and starts being a SHOW.

 That's a wrap - mark complete when your first episode is posted. Tag #THESCENEAI.

Lesson 5 · Module 04 – The SCENE Library – attach

Module 04 – The SCENE Library.pdf:

120 story ideas, organized so you can pull tomorrow's episode in thirty seconds. Between this and the monthly drops, "what do I post" is never your problem again.

 That's a wrap - mark complete when you've picked your next 5 episodes.

Lesson 6 · The Hook Vault – attach **The Hook Vault.pdf:**

150 hooks that stop the scroll in the first second. Pick one, put it in the first line of your caption or the first frame of your scene.

 That's a wrap - mark complete when you've saved your 10 favorites.

received from other members. Set each tile's classroom access to its

level. Tile name · 15-word description · full inside copy:

Inside:

 Everyone starts as an Extra. Points come from LIKES other members give your posts. 5 likes = Day Player, and the prizes get bigger from there – scroll the wall. Fastest first points: post your intro in  Start Here.

 That's a wrap – mark complete when your intro is up.

Level 2 · DAY PLAYER – description:

Your first credit: three hooks from the vault plus the first-post production checklist.

Your character earned a bigger world. 20 identity-locked scenes – 10 for her, 10 for him. Run one today.

Level 4 · CO-STAR – description:

Five scenes that exist nowhere else in the system. Co-Star exclusives only.

Inside:

Five scenes that exist nowhere else in the system: 1. The valet hands over keys to a car the character didn't drive there. 2. A table for two is set. The second chair is still empty when the food arrives. 3. The boutique closes early – for a private appointment under the character's name. 4. A stranger returns something the character lost years ago. 5. The rooftop is silent until the elevator doors open behind them.

Fill the [BRACKETS] like any drop scene. These are Co-Star exclusives – members below this level never see them.

Level 5 · LEAD – description:

Post your best episode, tag me, and I break it down for you personally.

Inside:

You made LEAD. Post your best episode in 📺 Episodes, tag me, and write "LEAD BREAKDOWN" in the first line. I'll break it down personally – what's working, what to fix, how to make Part 2.

STEP 6 · SEED CONTENT (do NOT skip – an empty group kills joins)

Pinned post in 📌 – FOUNDING 20:

🎬 FOUNDING 20 The first 20 members get their first episode personally broken down by me – what's working, what to fix, how to make Part 2. After 20, this becomes the monthly member mission prize. Drop your first episode in 🎬 Episodes and tag me.

– Post your best episode in 🎬 Episodes with 2 lines on how you directed it – be member #1 of your own group.

- Post in 🐼: "Drop 001 is live in the classroom. 30 scenes. Run one a day."
- Comp 3-5 people free (admin invite): people who'll genuinely run it. Ask each for an honest review or win post in week one.
- Test one \$9 join end-to-end from a second account: questions, approve, welcome.

STEP 7 • THE FUNNEL (organic – this runs before and during ads)

The whole road:

1. IG/TikTok post (proof-first) – caption says "Comment SCENE"
2. AutoDM sends the \$9 group link. DIRECT. No lead magnet.
3. THE SCENE AI \$9/mo – then the 📱 World Builder, \$97 in-app
4. DFY by invoice: \$297 – \$697 – \$997

AutoDM copy (keyword SCENE, ManyChat free):

You're in 📱 This is where I teach the whole system – your character, built and locked today, him or her: <https://www.skool.com/the-scene-ai-2627> \$9 founding price locks for life. Not for you? Full refund in your first 7 days.

- IG bio link – the Skool URL. Pinned post – best episode + "Comment SCENE."
 - Broadcast channel "THE SCENE AI 📱" – drops, wins, announcements.
- Weekly content engine (this IS the ad budget until ads unlock):
- 3 episodes/week of your character (1080p, 10-15s)
 - 2 proof posts/week: comment/view screenshots + one line of teaching + "Comment SCENE"
 - 1 build-in-public post/week: "watch me direct this scene"
 - Every post: keyword CTA. Every episode: 3 pinned comments from the Comment Blueprint.

STEP 8 • THE ADS (when the money rule unlocks them)

The gate, either/or:

- Revenue gate: the group's own earnings buy Pro + ad spend, OR
- War chest: ~\$1,000 of genuinely spare money (not borrowed, not credit, not rent) + ALL boxes checked: group live and stocked · first 10 paying members from the existing audience · one proven creative (already true – the 4,939 walk clip and 4,089 bottle scene

are pre-run winners) · Skool Pro + pixel verified firing.

Deploy as runway, not a bang: \$99 Pro + \$15/day for ~60 days.

Sixty days of learning beats thirty at double speed. Scale what's under \$25 CPA, kill what isn't.

Non-negotiables: No income claims, ever – views, comments, and cost-of-scene are the proof. No member-count thresholds in copy. Every ad: long copy (150–300 words), \$9 + \$0.30/day math, 7-day guarantee, one link – the Skool About page. When one ad wins, DUPLICATE it – don't write new copy.

AD 1 · "The receipt" the workhorse. Creative: the walk-through clip.

This whole vacation cost about \$12.

The penthouse. The rooftop pool. The beach club. The server bringing the drink over. Her.

None of it is real. I built all of it from my phone – no camera, no flights, no crew. The reason it doesn't look like plastic AI garbage is not the app. Everyone has the app. It's that I built and locked the character FIRST, and direct every scene like an episode.

That's the whole system inside THE SCENE AI:

✓ Build a character people recognize – him or her ✓ Lock the face so it never changes between posts ✓ 30 ready-to-run scenes dropped every month ✓ Copy-paste everything – written so simply a sixth grader could run it ✓ New tool settings every month (Seedance, Nano Banana Pro) ✓ Post your episodes, get feedback, get reposted

Founding rate: \$9/month. That's \$0.30/day. Locks for life. The price goes up as we grow – founders keep \$9 forever.

Not for you? Full refund in your first 7 days. Cancel anytime. 🖱 Enter THE SCENE
<https://www.skool.com/the-scene-ai-2627>

AD 2 · "She's not real" the craft angle. Creative: the bottle-delivery clip, overlay "she's not real."

99% of AI content looks fake.

Too smooth. Too perfect. A different face in every post. You can spot it from a mile away – and so can everyone else, which is why nobody follows those pages.

Now look at her. Real skin texture. Baby hairs. The same face, the same body, the same person – in the restaurant, at the pool, on the jet. People argue in my comments about whether she's real.

That's not an app setting. It's a system: the identity lock, the reference method, the continuity rules, the camera language that makes AI look like phone footage instead of a render.

THE SCENE AI teaches the whole thing, in order, copy-paste:

✅ The locked MASTER – one face, forever ✅ Outfits and hair that stay consistent (his AND hers, culturally accurate) ✅ Scenes that feel real, not staged ✅ Monthly drops so you never run out of episodes

\$9/month founding rate, locks for life. 7-day money-back guarantee. 🖱️

<https://www.skool.com/the-scene-ai-2627>

AD 3 · "Didn't join by accident" social proof. HOLD until ~100 members. Creative: grid-scroll of the character's feed.

[X]+ creators didn't join THE SCENE AI by accident.

They watched one character rack up views in the comments – arguing about whether she's real – and wanted the system behind her.

While you were scrolling, members inside were: – Locking characters that stay the same face in every scene – Running this month's drop: 30 scenes, 10 looks, one master episode – Getting their episodes broken down and reposted

\$9/month, locks for life. 7-day money-back guarantee. 🖱️

<https://www.skool.com/the-scene-ai-2627>

(Update [X] monthly as the count grows – cheapest copy refresh there is.)

AD 4 · "She posts every day" the no-camera angle. Creative: the money-dinner or suite clip.

She posts every day. She doesn't exist.

No camera. No outfits bought. No flights booked. No showing my face when I don't feel like it. The character does the posting – I do the directing, from my phone, in minutes.

If you've ever wanted a content page that doesn't need your face, your wardrobe, or your location – this is exactly that. Build them once. Direct them forever. Him or her.

✓ Your character, built and locked this week ✓ 30 new scenes every month so you never stare at a blank prompt ✓ Everything copy-paste. No editing skills. No film school.

\$9/month founding. Full refund in your first 7 days if it's not for you. 🖱

<https://www.skool.com/the-scene-ai-2627>

AD 5 • "Copy and paste" beginner safety. Creative: 15-second screen record, prompt – paste – scene appears.

You don't know anything about AI? Good. You'll learn faster.

Everything inside THE SCENE AI is copy and paste. The character prompt. The scenes. The camera settings. The captions. Even the comment you pin under your first post.

It's written so simply a sixth grader could run it – on purpose. Because the people winning with AI content right now aren't engineers. They're the ones who followed a system in order.

Step 1: build the face. Step 2: lock it. Step 3: post your first episode. Most members do all three in their first sitting.

\$9/month founding rate. \$0.30/day. 7-day money-back guarantee. 🖱

<https://www.skool.com/the-scene-ai-2627>

THE SCENE · Join Only for \$9

Later plays (after the set finds its CPA): persona variants (the 9-to-5er, the creator tired of showing their face, the beauty pro, the new mom) – same skeleton, new opening line · the meta-proof ad ("this ad cost \$4 in credits, starring a woman who doesn't exist") · yearly offer to warm traffic only, never cold.

WHAT DOES NOT HAPPEN AT LAUNCH

- No Skool Pro, no pixel, no ads until the money rule says so

- No fake member-count thresholds, on the page or in ads
- No free trial, no free lead magnet - the funnel goes straight to the \$9 door
- No masterclass commitments - drops and member missions are the calendar
