PRODUCTION BLUEPRINT

From character development to released episode.

CAST THE CHARACTER. DEVELOP THE STORY. DESIGN THE WORLD.
RELEASE THE EPISODE.

PART 01 OF 19

THE
SCENE AI

CREATE CINEMATIC CONTENT.
BUILD YOUR DIGITAL WORLD.

THE PRODUCTION PIPELINE

One production. Four departments. Follow the order the first time. Any character, any world, any story.

Build your character. Build your story. Build your world. Create and grow.

What each department locks

- › CASTING – who? Cast the lead and lock the identity.
- › DEVELOPMENT – what happens, and how it opens.
- › PRODUCTION DESIGN – what does it look like? Lock the look, set, continuity, and camera.
- › PRODUCTION + RELEASE – produce it. Release it. Repeat it.

First production: run the whole pipeline in order. Next episode: jump straight to the department that solves the problem – your cast and your world are already locked, so most episodes start at development.

ZONE 1 – CASTING

Lock your characters before anything else. Every future image, scene, and episode should match the same faces, body types, styling, and details, so your series feels consistent and impossible to ignore.

FEMALE LEAD

MALE LEAD

BACK

REAR 3/4

- CAST LOCKED – ready for production.

What Zone 1 locks

- › Lead characters – the people your audience will follow.

- › Face identity – facial structure, eyes, lips, brows, skin tone, and expression range.
- › Body and silhouette – your character should still look like them from head to toe.
- › Signature looks – wardrobe helps the audience recognize your cast before they even speak.
- › Distinctive details – hair, jewelry, skin, grooming, and signature features.

YOUR EPISODE PRODUCTION CYCLE

After the first setup, every new episode runs through a smaller production loop.

Choose the moment. Choose the opening. Lock world details. Create the shots. Cut and caption. Release it. Study and repeat.

SAMPLE PRODUCTION

A founder walks into a meeting.

An unreleased product is already sitting on the table.

- SCENE – a normal meeting becomes an unexpected partnership conversation.
- HOOK – open on the unreleased product. Do not explain why it is there.
- PREP – lock cast, office, wardrobe, references, camera, and continuity.
- GENERATE – create the stills, motion, and final shots.
- EDIT + RELEASE – cut before the answer. Release it. Let the audience ask what happens next.

SCENE > HOOK > PREP > GENERATE > EDIT > RELEASE – then review the response and produce the next episode.

FIRST PRODUCTION VS. NEXT EPISODE

Run the whole studio once. After that, jump to the department you need.

FIRST PRODUCTION

RUN THE FULL PIPELINE

- Cast + lock the character
- Learn the SCENE Method
- Develop the story + hook
- Complete production design
- Generate, edit, and release

NEXT EPISODE

JUMP TO THE DEPARTMENT

- Need a story? SCENE Library
- Need an opening? Hook Vault
- Need consistency? World Builder
- Need the final build? Prompt Vault
- Then generate, edit, release, repeat

One studio. Different department for each job.

You do not restart the whole system before every episode. Find the department, fix the problem, keep producing.

YOUR PRODUCTION TOOL KIT

One tool for each department. Keep the stack simple and consistent.

SCRIPT + PROMPTS

ChatGPT or Claude

Write + store prompts.

STILLS + CAST

ChatGPT Image or Nano Banana Pro

Create faces, poses, references, and stills.

VIDEO

Seedance 2.0

Turn references into video.

CAMERA + MOTION

Kling

Control movement and camera behavior.

EDIT + RELEASE

CapCut

Cut, caption, sound, export.

STUDIO RULE

SAME MASTER. SAME TOOLS. SAME SERIES.

Switching apps every week is how faces, style, and continuity drift.

NEXT STEP

Go to MODULE 01 — CHARACTER FIRST

THE SCENE AI / CREATOR OS

SHARE YOUR WORLD.

Post your episodes with #THESCENEAI so your work gets seen.

New scene drops, packs and tools land every month inside
