How to use this pack

Use these prompts in order. Prompt 1 makes a brand-new character. Prompt 2 makes 10 shoulders-up face angles. Prompt 3 makes 10 full-body angles. Making an AI twin? Upload a clear selfie and skip Prompt 1. Do not start The SCENE Method until you have saved the MASTER and both DNA batches.

Choose the correct section

- Female fictional character: use Prompt 1F, then Prompts 2 and 3.
- Male fictional character: use Prompt 1M, then Prompts 2 and 3.
- AI twin of any gender: upload a clear selfie, skip Prompt 1, then use Prompts 2 and 3.
- Recurring supporting character: repeat the same steps. Save a separate MASTER and DNA folder for them.

```
A realistic front-facing selfie of a [AGE]-year-old [ETHNICITY] woman, taken on a phone. She is clearly [ETHNICITY] with [SKIN TONE] skin and beautiful, true-to-her features. Naturally gorgeous, the kind of face that stops you scrolling, but soft and bare with no makeup. Real skin texture, natural glow, [KEY FEATURES]. [HER ENERGY / WALL]. Her hair is [HAIRSTYLE]. Wearing a [SIMPLE TOP]. Tiny stud earrings only, minimal jewelry. Natural indoor window light, plain everyday apartment background. Authentic, candid phone selfie, not studio, not glam, but undeniably beautiful. Clearly a [SKIN TONE] [ETHNICITY] woman, real. Shot at arm's length on the front camera, at eye level, slightly imperfect framing, one shoulder closer to the lens. Matte real skin with visible pores, soft natural light only, no glossy shine, no retouching. Nothing staged or posed toward the camera, ordinary imperfect background.

(If she drifts too pretty, older, or off from who you want, add: "less glam, not older, keep her [ETHNICITY] and [SKIN TONE], more ordinary" and run again.)
