MODULE 03

THE SCENE METHOD

The connected system you use to direct every episode.

CREATE THE CHARACTER. DIRECT THE SCENE. BUILD THE WORLD.

THE SCENE AI

CREATE CINEMATIC CONTENT.
BUILD YOUR DIGITAL WORLD.

What this is

This is a system for making short, movie-style AI story videos. These videos stop the scroll and build a world people recognize. They also move viewers toward a next episode, a conversation, an offer, a booking link, a product or a brand deal.

1 STORY ▶ 2 CAST ▶ 3 ENVIRONMENT ▶ 4 NOW BUILD ▶ 5 END STAMP

Do the five parts in this order, every episode.

THE ONE RULE
Character first. Then story before look. Your MASTER and DNA sheet should already be done from Modules 01 and 02.

LETTER	STAGE	DIRECTOR DECISION
S	STORY	Write the scene step by step. Start on the sharpest moment. Pick the hook, action, reaction, emotional change and cliffhanger before you pick the outfit.
C	CAST	Put your locked lead character into the moment. Add other people only if they add tension, information, emotion or movement. Save a MASTER for every person who comes back.
E	ENVIRONMENT	Build the world the story needs: place, time, lighting, weather, crowd, props, products, signs, sound and what happens in the background.
N	NOW BUILD	Give each reference image a job. Spell out the camera, placement, framing, movement, timing, dialogue, blocking, realism, continuity and what to avoid. Generate shots in story order.
E	END STAMP	End on something people recognize, an action to take, or a reason to keep watching. Use a signature line, an open question, a reaction, a CTA, a reveal or a setup for the next episode.

S - STORY

Write the scene step by step. Start on the sharpest moment. Pick the hook, action, reaction, emotional change and cliffhanger before you pick the outfit.

- What is already happening in frame one?
- What should the viewer wonder immediately?
- What changes before the scene ends?
- What one action and one reaction must land?
- Why is another episode needed?

C - CAST

Put your locked lead character into the moment. Add other people only if they add tension, information, emotion or movement. Save a MASTER for every person who comes back.

- Lead identity reference
- Supporting character identity reference
- Relationship and power dynamic
- Who speaks, reacts, observes and exits
- How they feel at the start and at the end

E - ENVIRONMENT

Build the world the story needs: place, time, lighting, weather, crowd, props, products, signs, sound and what happens in the background.

- Exact location and time
- Lighting source and weather
- Background people and how they naturally act
- Products and props that must stay the same
- Background sound and believable details

N - NOW BUILD

Give each reference image a job. Spell out the camera, placement, framing, movement, timing, dialogue, blocking, realism, continuity and what to avoid. Generate shots in story order.

- Open Module 07: Reference Blueprint (in THE WORLD BUILDER)
- Open Module 09: Camera Bible (in THE WORLD BUILDER)
- Use Module 08: Continuity System for Part 2+ (in THE WORLD BUILDER)
- Run Module 10: Realism Check before generating (in THE WORLD BUILDER)
- Use the detailed scene templates in Module 11: Prompt Vault (in THE WORLD BUILDER)

E - END STAMP

End on something people recognize, an action to take, or a reason to keep watching. Use a signature line, an open question, a reaction, a CTA, a reveal or a setup for the next episode.

- Signature stamp
- Caption CTA
- Pinned comment
- Brand tag or product
- Cliffhanger or next-scene tease

15-second timing map

TIME	JOB
0-3 sec	Hook: the strongest image, line, surprise or unanswered question.
3-6 sec	Context: show just enough to understand what is going on.
6-10 sec	Action: the character does, gets, finds or decides something.
10-13 sec	Reaction: give the feeling enough time to land.
13-15 sec	End stamp: wrap it up, get an action, or make people need the next episode.

Rules you must always follow

- The hook is visible in frame one.
- Shoot vertical 9:16 unless the platform needs a different shape.
- One main action per short clip.
- Dialogue fits real-world timing.
- The camera sits in a spot where a real camera could be.
- Every reference image has a job.
- Identity, products and setting are clearly locked so they stay the same.
- The scene has tension, curiosity or a change in emotion.
- The ending makes people recognize something, take action or keep watching.

NEXT

Use Module 07 to map your references. Use Module 09 to pick camera language. Use Module 11 to build the final prompt. All of these live inside THE WORLD BUILDER — unlock it when you are ready to go deeper.
