MODULE 09

CAMERA BIBLE

Make the camera feel real, planned, and part of the story.

CREATE THE CHARACTER. DIRECT THE SCENE. BUILD THE WORLD.

THE SCENE AI

CREATE CINEMATIC CONTENT.
BUILD YOUR DIGITAL WORLD.

The camera must exist

Before you pick a film-style label, answer three things. Where is the camera in the scene? Who or what is holding it? Does the character notice it, and why or why not?

CAMERA STYLE	BEST FOR	BELIEVABLE PLACEMENT
iPhone front camera	Selfie vlog, talking to camera, walking update	Arm's length, tripod, MagSafe stand or dashboard mount
iPhone rear camera	Sharper, more detailed lifestyle footage	Friend filming, tripod, table stand or handheld follow
Stationary tripod	Dialogue, room reveal, full-body action	Eye level, waist level or low angle
POV	The viewer becomes the character	Eye-level movement with natural head motion
Hidden / discreet camera	Moments that feel unplanned	Behind a bag, plant, shelf or table object
Security camera / CCTV	Funny or fly-on-the-wall reveals	High corner, fixed wide lens, timestamp optional
Car dashboard mount	Talking or reacting while driving	Center of windshield or angled passenger-side mount
Bodycam	Urgent first-person action	Chest-level wide angle
GoPro / action camera	Water, sports, movement	Chest, head, vehicle or handheld grip
Drone	Showing the location or big movement	Outside only, at a believable height and path
Documentary handheld	Close, real-life observation	A person follows with slight shake and reframing
Reality TV	Confessional, reaction, reveal	Multi-camera or shoulder-mounted operator
Fashion campaign	Controlled performance and styling	Dolly, slider, tripod or crane

CAMERA STYLE	BEST FOR	BELIEVABLE PLACEMENT
Music video	Performance and movement set to the beat	Gimbal, handheld, dolly or planned tracking
Interview / podcast	Authority and conversation	Locked two-camera setup or one clean angle

Camera specification block

COPY THIS PROMPT PASTE IT INTO YOUR AI TOOL

```
CAMERA Captured on [DEVICE / CAMERA]. Vertical 9:16. [RESOLUTION] at [FRAME RATE].

[HDR / COLOR SCIENCE if relevant].

CAMERA PLACEMENT The camera is [EXACT PHYSICAL LOCATION]. It is held or mounted by [PERSON / OBJECT]. Height: [EYE / CHEST / WAIST / TABLE / FLOOR]. Distance: [APPROXIMATE]. Framing: [CLOSE / MEDIUM / WIDE]. Movement: [STATIONARY / PUSH-IN / PAN / FOLLOW / HANDHELD]. No impossible angles, teleporting or unexplained camera movement.
```

Lens + framing language

LOOK	USE
24-35mm wide	Places, groups, room reveals, and full-body movement.
50mm natural	Medium shots at human scale. Looks like a real phone view.
85mm portrait	Faces, reactions, authority, and luxury beauty detail.
100mm macro/detail	Products, tools, jewelry, food, and textures.
0.5x phone wide	Energetic low-angle or close group shots. Use with care to avoid distortion.

Movement rule

One short clip usually needs just one camera move. A push-in, pan, orbit, and zoom in eight seconds looks fake. Pick the one move that fits the emotion.
