The Director's Master Template

This is the full skeleton for a video master prompt — the way working creators actually run scenes through tools like Higgsfield 2.0. Every section has ONE job. You never mix wardrobe with lighting, or camera with dialogue. Fill in the brackets top to bottom, then paste the WHOLE thing with all of your reference images attached.

#	SECTION	ITS ONE JOB
1	Reference Images	Who and what each uploaded photo controls
2	Identity Lock	The face never changes
3	Camera	How it is filmed
4	Hands	What each hand holds — and no extra devices
5	Scene	What happens, and every spoken line
6	Movement	How the body moves naturally
7	Realism	What makes it believable
8	Atmosphere	What the world feels and sounds like
9	Length	How long the clip runs
10	Style	The feeling the first three seconds must create

Where each piece goes

STEP	WHAT YOU DO	WHICH APP
1	Fill in this template (save your version)	ChatGPT
2	Generate the MASTER, poses and reference photos	Nano Banana Pro
3	Paste the WHOLE template + attach every reference image	Seedance 2.0 or Higgsfield
4	Trim, captions, sound	CapCut

The dialogue budget (this decides if lips sync)

- Keep every spoken line 5–10 words. Short lines sync; long lines drift.
- People speak about 2 words per second — a 15-second clip has room for roughly 25–30 spoken words TOTAL, and less if the character is walking or reacting.
- Heavy talking? Keep the clip 10 seconds or under — lip-sync quality drops on longer generations.
- Three or four short lines beat one long speech. Let the action carry the rest.

Copy the whole template below. Save your filled version — that becomes YOUR master, and every new episode is a small edit, not a rewrite.
