

THE SCENE AI / CREATOR OS

MODULE 01

CHARACTER FIRST

Decide who the audience will follow before you generate a single image.

CREATE THE CHARACTER. DIRECT THE SCENE. BUILD THE WORLD.

CREATE CINEMATIC CONTENT.
BUILD YOUR DIGITAL WORLD.

Why this comes first

AI can generate a beautiful face in seconds. A face with no story behind it is still just a picture. A strong character has a real role, a recognizable identity, a specific starting point, one wall and something they want. That is what makes people watch the next episode.

Choose your path

PATH A – AI TWIN	PATH B – FICTIONAL CHARACTER
Upload a clear selfie of yourself or another consenting adult. Skip Prompt 1 in the Prompt Pack. Use Prompts 2 and 3 to build a consistent AI version of the person.	Build a brand-new woman or man from scratch. Complete Prompt 1 in the Prompt Pack, choose the generation that feels like the character, save it as the MASTER, then complete Prompts 2 and 3.
IMPORTANT Only create an AI twin of another real person when you have their permission to use their likeness.	

Build the character from 8 decisions

1. ROLE

Who are they in the story: creator, founder, artist, customer, parent, partner, employee, traveler, realtor, musician or fictional lead?

2. AUDIENCE

Who should recognize themselves, their desire or their world in this character?

3. STARTING POINT

Where are they emotionally, socially or professionally before the story moves?

4. ONE WALL

Choose one clear obstacle. One wall creates focus. Five walls create confusion.

5. DESIRE

What do they want underneath the wall: confidence, attention, belonging, freedom, love, status, safety, clarity or a new beginning?

6. PERSONALITY

How do they speak, move, react, dress and handle tension?

7. VISUAL IDENTITY

Age range, ethnicity, skin tone, facial features, hair, grooming, body type, tattoos, piercings, signature accessories and wardrobe direction.

8. WORLD

Where do they naturally belong: Buckhead, a resort, a studio, an office, a tour bus, a salon, a family home, a campus or nightlife?

Body type belongs in the identity plan

Body type is not a beauty score. It is a continuity instruction. Choose the words that accurately describe the character and keep them consistent across the MASTER and full-body DNA sheet.

WOMEN / FEMME CHARACTERS	MEN / MASC CHARACTERS
slim, petite, athletic, curvy, hourglass, thick, plus size, natural BBL, dramatic BBL, tall, short, fuller bust, wider hips, long legs, short torso	slim, lean, athletic, muscular, stocky, broad-shouldered, big and tall, plus size, dad build, defined, natural build, tall, short

Scroll-stopping and real

SCROLL-STOPPING	REAL
Distinct enough to stop the thumb. A clear face, energy, styling and point of view.	Believable enough that the audience can emotionally enter the story. Natural skin, specific features, human expression and a life beyond looking perfect.

Your Character Blueprint

_____	Character name
_____	Pronouns
_____	Age range
_____	Ethnicity / cultural identity
_____	Skin tone
_____	Face shape and key facial features
_____	Natural hair texture / typical grooming

-----	Signature hairstyle
-----	Height and body type
-----	Tattoos, piercings, facial hair or marks
-----	Occupation / role
-----	Personality in three words
-----	Speaking style
-----	Starting point
-----	One wall
-----	Core desire
-----	Typical locations
-----	Signature wardrobe
-----	Recurring accessories / props
-----	Supporting relationships
-----	What the audience should feel

Now go to the Prompt Pack

REQUIRED NEXT STEP

Before you begin The SCENE Method, open Module 02: The Prompt Pack. Fictional character: complete Prompts 1, 2 and 3. AI twin: upload your selfie, skip Prompt 1 and complete Prompts 2 and 3. Save the MASTER, headshot DNA sheet and full-body DNA sheet. Then return to Module 03.
