

THE SCENE AI / CREATOR OS

MODULE 04

THE REFERENCE BLUEPRINT

Give every uploaded image one clear job.

CREATE THE CHARACTER. DIRECT THE SCENE. BUILD THE WORLD.

CREATE CINEMATIC CONTENT.
BUILD YOUR DIGITAL WORLD.

Why your prompts work

Strong results do not come from uploading random inspiration and hoping the model understands. Your prompt must tell the model exactly what each image controls and what it must never influence.

The core reference order

REF	JOB	WHAT IT CONTROLS
1	Identity	Exact face, skin tone, ethnicity, facial structure, body identity. Highest priority.
2	Outfit / grooming	Exact clothing, shoes, bag, jewelry, hair or facial hair.
3	Environment	Location, architecture, furniture, lighting, crowd and atmosphere.
4	Composition / continuity	Pose, camera framing, previous episode or exact opening frame.
5	Product / prop / supporting character	Bottle, bag, car, food, device, second person or branded object.
6+	Specialized control	Makeup, nails, signage, camera angle, action, weather or secondary location.

Copy-and-paste reference block

Master reference mapping block

REFERENCE IMAGES (USE ALL REFERENCES TOGETHER) Reference 1 - Identity Reference (Highest Priority) Use this image as the exact identity source. Preserve the exact face, skin tone, ethnicity, facial structure, eyes, nose, lips, brows, hairline, body proportions and overall appearance. Do not let any other reference alter identity.

Reference 2 - Outfit / Grooming Reference Use this image only for wardrobe, shoes, accessories, hair and grooming. Preserve the exact person from Reference 1.

Reference 3 - Environment Reference Use this image only for location, lighting, architecture, furniture, crowd and atmosphere. Do not borrow faces or bodies from this reference.

Reference 4 - Composition / Continuity Reference Use this image for camera placement, framing, pose and continuity with the previous episode.

Reference 5 - Product / Prop / Supporting Character Use this image only for the named object or supporting person. Preserve exact shape, proportions, color, label and placement when visible.

Do not waste reference slots

- › Use a reference for details the model must see, not details that can be described clearly.
- › Identity and recurring characters deserve dedicated references.
- › Use an outfit image when exact construction, print or accessories matter.
- › Use a product image when shape, label, cap, color or proportions must remain accurate.
- › Use the previous episode frame when two clips must cut together seamlessly.
- › Do not upload multiple images that fight for the same job unless you explain the hierarchy.

Reference planner

SLOT	FILE / IMAGE	ASSIGNED JOB	MUST NOT CHANGE
1		Identity	
2		Outfit / grooming	
3		Environment	
4		Composition / continuity	
5		Product / prop / support
