

THE SCENE AI / CREATOR OS

MODULE 07

CAMERA BIBLE

Make the camera feel physically possible, intentional and native to the story.

CREATE THE CHARACTER. DIRECT THE SCENE. BUILD THE WORLD.

CREATE CINEMATIC CONTENT.
BUILD YOUR DIGITAL WORLD.

The camera must exist

Before choosing a cinematic label, explain where the device physically is, who is holding it and why the character does or does not notice it.

CAMERA LANGUAGE	BEST FOR	BELIEVABLE PLACEMENT
iPhone front camera	Selfie vlog, direct address, walking update	Arm's length, tripod, MagSafe stand or dashboard mount
iPhone rear camera	Higher-detail lifestyle footage	Friend filming, tripod, table stand or handheld follow
Stationary tripod	Dialogue, room reveal, full-body action	Eye level, waist level or low angle
POV	Viewer becomes the character	Eye-level movement with natural head motion
Hidden / discreet camera	Spontaneous-feeling interaction	Behind bag, plant, shelf or table object
Security camera / CCTV	Comedic or observational reveal	High corner, fixed wide lens, timestamp optional
Car dashboard mount	Driving dialogue or reaction	Centered windshield or angled passenger-side mount
Bodycam	Urgent first-person action	Chest-level wide angle
GoPro / action camera	Water, sports, movement	Chest, head, vehicle or handheld grip
Drone	Establishing location or movement	Exterior only, believable altitude and path
Documentary handheld	Intimate real-life observation	Operator follows with subtle shake and reframing
Reality TV	Confessional, reaction, reveal	Multi-camera or shoulder-mounted operator
Fashion campaign	Controlled performance and styling	Dolly, slider, tripod or crane
Music video	Rhythmic performance and movement	Gimbal, handheld, dolly or choreographed tracking
Interview / podcast	Authority and conversation	Locked two-camera setup or clean single angle

Camera specification block

COPY-AND-PASTE CAMERA BLOCK

CAMERA Captured on [DEVICE / CAMERA]. Vertical 9:16. [RESOLUTION] at [FRAME RATE].

[HDR / COLOR SCIENCE if relevant].

CAMERA PLACEMENT The camera is [EXACT PHYSICAL LOCATION]. It is held or mounted by [PERSON / OBJECT]. Height: [EYE / CHEST / WAIST / TABLE / FLOOR]. Distance: [APPROXIMATE]. Framing: [CLOSE / MEDIUM / WIDE]. Movement: [STATIONARY / PUSH-IN / PAN / FOLLOW / HANDHELD]. No impossible angles, teleporting or unexplained camera movement.

Lens + framing language

LOOK	USE
24–35mm wide	Environment, groups, room reveals and full-body movement.
50mm natural	Human-scale medium shots and believable phone-like perspective.
85mm portrait	Faces, reactions, authority and luxury beauty detail.
100mm macro/detail	Products, tools, jewelry, food and textures.
0.5x phone wide	Energetic low-angle or close group shot; use carefully to avoid distortion.

Movement rule

One short clip usually needs one camera move. A push-in plus pan plus orbit plus zoom in eight seconds feels synthetic. Choose the movement that supports the emotion.
